

SUCCEED WITH STEM

Delta High School connects what you learn in class to what professionals do in the real-world. At Delta, students work together on projects designed to combine science, technology, engineering and mathematics (STEM) with social studies and language arts.

At Delta, what you learn **today** — you use **tomorrow**.

“There is nothing more rewarding than finding what works or doesn’t and leading the way.”

Omar Z. Freemire, Class of 2013

THE CHOICE IS YOURS

Delta is different. Through hand-on projects, classes that link to one another and access to advanced technology, Delta students learn by doing. Students work with mentors, teachers, and friends to discover the world around them. At Delta you will learn how to learn and be a partner in your own education while exploring more of the ideas and topics you find interesting.

CHOOSE TO STAND OUT

If you’re willing to work hard, like to challenge yourself, and want to interact with local professionals and community leaders, then Delta could be for you.

The future is yours to create. Spend your school day diving into engaging STEM projects, and then participate in activities and sports programs at your neighborhood school if you wish.

Your limits are set only by your own **ambition** and **imagination**.

Science Technology Engineering Mathematics

YOUR FUTURE STARTS TODAY

Delta students are:

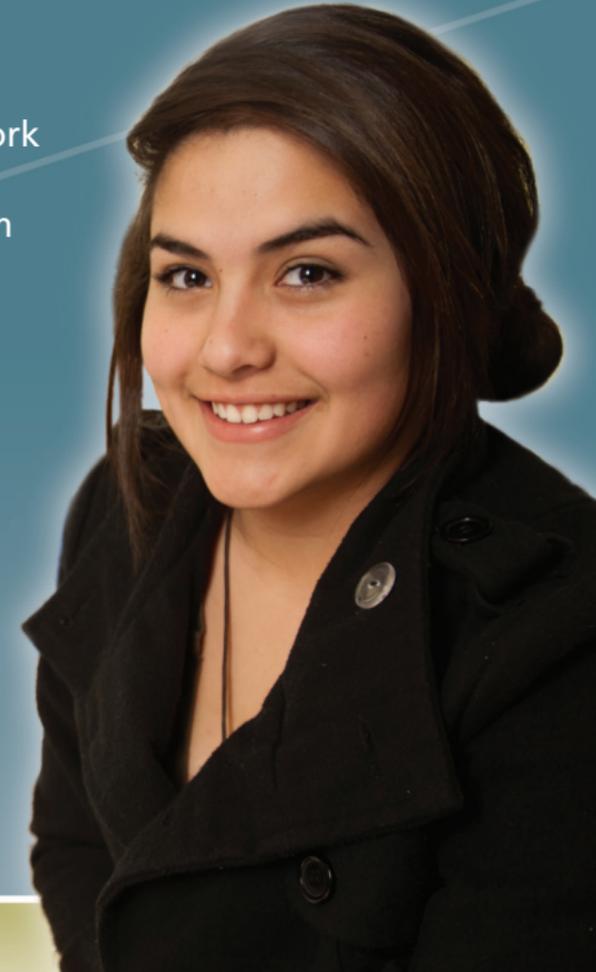

- Creative
- Curious
- Hands-on learners
- Problem solvers
- Ready to work hard
- Willing team members

"Now that I am in Delta I know that the whole point of Delta is to teach us how to learn, not what to learn."

Aide Farias, Class of 2014
